**Systems Engineering Named One of 2016 Tech Elite Solution Providers by CRN®**  
*Tech Elite 250 list recognizes IT solution providers with deep technical expertise and premier certifications*

**Portland, ME – March 28, 2016** – Systems Engineering announced today that [CRN®](#), a brand of [The Channel Company](#), has named Systems Engineering to its 2016 Tech Elite 250 list. This annual list honors an exclusive group of North American IT solution providers that have earned the highest number of advanced technical certifications from leading technology vendors.

To compile the annual list, The Channel Company's research group and CRN editors work together to identify the most customer-beneficial technical certifications in the North American IT channel. Companies who have obtained these elite designations— which enable solution providers to deliver premium products, services and customer support—are then selected from a pool of online applicants.

“Providing our workforce with various training and certification opportunities is a high priority for us,” said Robert Leslie, Chief Technical Officer of Systems Engineering. “In doing so, our clients receive the advantage that comes from having a broad range of skillsets coupled with a deep understanding of how technology aligns with their businesses.”

“The solution providers selected for our annual Tech Elite 250 list have demonstrated a commitment to excellence and gained strong industry credibility by earning some of the most difficult IT certifications available from top technology vendors,” said Robert Faletra, CEO, The Channel Company. “Attainment of these exclusive certifications strengthens the channel as a whole by invigorating partnerships and enabling the delivery of exceptional customer service. We congratulate each of these organizations and look forward to their continued success.”

“We are pleased to be included in the CRN Tech Elite 250 for the fifth year in a row,” said Craig Tribuno, President of Systems Engineering. “By investing in the education of our team, we are able to offer our clients quality products and services that's hard to beat.”

Coverage of the Tech Elite 250 will be featured in the April issue of CRN, and online at [www.crn.com](http://www.crn.com).
